

**JS-13873 Private Integrated Services Network (Call Diversion supplementary services)
- Specifications for inter-PBX signalling protocol -**

<Remarks>

1. Relations with international standards

This standard conforms to the second edition of the international standard ISO/IEC 13873(2003) with regard to the call diversion supplementary services in private integrated services digital network issued by ISO/IEC JTC1.

2. Summary of differences from international standards

Considering the status of domestic public networks, the descriptions in the original international standard regarding "Interworking with public ISDNs" are left for further study.

In addition, there are amendments made because of the editorial errors which exist in the original international standard, and are indicated by "notes" where required.

3. History of revisions

Version	Date of issue	Contents of revision
1	November 26, 1997	Initial issue
1.1	November 25 1999	Reflection for amendments of the international standard Amendments for clarification of the defined specification
2	August 26 2004	Amendments corresponding to the relating international standard

4. Others

(1) Referred recommendations and/or standards
