

JT-F730

Videoconference Services, General

< References >

1.Relations with international recommendations

This standard describes the general functions and the attributes of the videoconference services regardless of the network environment from which service is offered, conforms to the recommendation scheme F.730 which was decided in CCITT held in August 1992.

2.Departures from the above international recommendation

2.1 Optional items

None

2.2 National matter items

None

2.3 Others

(1) Concerning the 64 kbit/s PCM voice coding, this standard refers to the CCITT recommendation, not the TTC standard, because both A-law and μ -law have to be taken into account.

(2) The items described as "Subject of further study in the future" in this standard, will be standardized taking the CCITT study progress into consideration.

2.4 Differences from ITU-T Recommendation on the framework

The "Summary" without a chapter number in the above international recommendation has been merged with "Introduction" in chapter 1 and has become "Range of regulations in this standard".

3. Up-dating

Edition	Date	Contents
The 1st	April 27, 1993	Enactment
