

JT-H320

Narrow-band visual telephone systems and terminal equipment

< References >

1. Relations with international standards

This standard describes the technical requirements, for example, system description, terminal requirements and intercommunication, for audiovisual services, where channel rates is up to 1920kbit/s, and conforms to the ITU-T recommendation H.230 which was revised in the World Telecommunication Standardization Conference (WTSC-93) held in March 1993, and subsequently revised by the ITU-T Study Group 16 (SG16) held in May 1999.

2. Departures from the above international recommendation

2.1 Optional items

None

2.2 National matter items

None

2.3 Others

(1) Concerning the 64kbit/s PCM voice coding and channel rates, this standard refers to the ITU-T recommendation, not the TTC standard, because both A-law and μ -law, and the channel rates of 1920kbit/s have to be taken into account.

(2) The items described as "under study" or "subject for further study" in this standard, will be standardized taking the ITU-T study progress into consideration.

2.4 Differences from the above ITU-T recommendation on the framework

None

3. Up-dating

Edition	Date	Contents
The 1st	November 28, 1990	Enactment

The 2nd	April 27, 1993	Addition and modification conforming to the revision of the corresponding ITU-T recommendation
The 3rd	November 27, 1996	Addition and modification conforming to the revision of the corresponding ITU-T recommendation
The 4th	November 26, 1997	Addition and modification conforming to the revision of the corresponding ITU-T recommendation
The 5th	November 25, 1999	Addition and modification conforming to the revision of the corresponding ITU-T recommendation

4. Others
