

# JT-Q1901 Bearer Independent Call Control Protocol

## 1. Relations with international standards

This standard conforms to the draft Recommendation Q.1901 determined at the ITU-T SG11 meeting in December 1999.

## 2. Summary of differences from the international recommendations

### 2.1 Optional items

None

### 2.2 National items

None

### 2.3 Others

- (1) In the following items this Standard either omits items described in the above international standard or selects one of the alternatives described therein:

Description which is specified in ITU-T Recommendation but is out of scope of this Standard, is remained in this Standard and is marked with ‘#’ to assist for understanding.

- (a) The descriptions for international connection.
  - (b) The deleted items which are not applied in the TTC Standards JT-Q761-Q764.
- (2) This Standard includes the following additional items to the above ITU-T Recommendation (marked with ‘\*’ in the statements).
- (a) The added items which are specified in the TTC Standards JT-Q761-Q764.
- (3) The items, which are explicitly stated not to be applied, are not marked with ‘#’ and/or ‘\*’, even if those items are deleted items and/or additional items in the reference TTC Standards from this Standard.

## 3. The history of revised versions

Version	Date	Outline
