JT-Q2761
Broadband ISDN (B-ISDN) Functional Description of the B-ISDN User Part (B-ISUP) of Signalling System No. 7

1.Relations with international standards

This Standard conforms the Recommendation Q.2761 approved for the ballot at ITU-T SG11 plenary meeting in September 1994.

2. Summary of departures from ITU-T Recommendations

2.1 Optional items

None.

2.2 National items

None.

2.3 Others

(1) This Standard has no items that go ahead of those in ITU-T Recommendations.
(2) The following items are deleted from the above ITU-T Recommendation:
    (a) Forward address signalling - Overlap operation
    (b) Descriptions for international gateway exchanges
    (c) ASEs for supplementary services in Figure 1-1/JT-Q2761
    (d) Some functions/services in Table 5-1/JT-Q2761
    (e) Relationships to other Standards/Recommendations and some descriptions for references
They are deleted for the following reasons:
    (a) This is because it is not required in national standard.
    (b) This is because it is defined for international connection.
    (c) This is because Recommendations for supplementary services were not approved when this Standard was first specified.
    (d) This is because it is not required in national standard.
    (e) This is because there are some Recommendations which have not yet standardized.
(3) The following items are modified from the above Recommendation:
    (a) Subclause 1.1 and note in clause 2 are modified to adapt this Standard.
(4) In this Standard, no deletion nor modification is made to simple segmentation in clause 5 and services assumed from the MTP in clause 6 because MTP for B-ISUP is under study in ITU-T.

2.4 Comparison of chapter composition between the ITU-T Recommendation and this Standard

There is no deference in chapter composition with the above ITU-T Recommendation.

3. The History of revised versions.

Version	Date	Outline
1	April, 27, 1995	Established

4. Others

None.
