

JT-Q2957.1 Stage 3 Description for Additional Information Transfer Supplementary Services Using B-ISDN Digital Subscriber Signalling System No.2 (DSS 2) - Basic Call - User-to-User Signalling(UUS)

1. Relation with the international standards

This Standard is based on the Recommendation Q.2957.1 approved in ITU-T SG11 meeting in July of 1999 at Leipzig.

2. Difference from ITU-T Recommendations / international standards

2.1 Selected options

None.

2.2 Optional items

None.

3. History of revised versions

Version	Date	Outline
1	November 25, 1999	Published

4. Remarks

According to the methodology of ISDN services defined in ITU-T Recommendation I.130, the definition of each supplementary service is described in JT-I25x series (Stage 1) and the functions of network and terminal for each supplementary service are described in ITU-T Recommendation Q.80 series (Stage 2).

Interactions with services which are not yet standardized at present are described in this standard, although they may be updated when those services are standardized.

5. Others

(1) Recommendations and Standards to be referred to

(i) TTC Standards

JT-I257 [I], JT-I413, JT-I580, JT-Q931, JT-Q2931

(ii) ITU-T Recommendations

E.164, I.130, X.213

(iii) ISO

ISO 8348
