

## JT-T42

### Continuous Tone Colour Representation Method for Facsimile

#### 1.Relations with international standards

This standard is based on ITU-T Recommendation T.42 that was agreed at the Resolution No.2 procedure at the ITU-T WTSC meeting in October 1996. The standard defines a continuous tone colour data representation method in order to make it possible to interchange continuous tone colour image data over a facsimile communication service such as Group 4 or Group 3 facsimile.

#### 2. Summary of departures from ITU-T Recommendations

##### 2.1 Selection of optional items

None

##### 2.2 Decision of national matter items

None

##### 2.3 Others

None

#### 3.History of revision

Version No.	Date	Content of revision
1st Version	April 27, 1995	First edition
2nd Version	April 23, 1997	Modification due to the addition of N bit/component extension and colour reproduction information extension
