Document Application Profile PM-26 for the Interchange of Mixed Content Documents in Processable and Formatted Forms

1.Relations with international standards international standardized profile

This standard describes a document application profile for enhanced document structure with character, raster graphics and geometric graphics content architectures in three forms - processable form, formatted form and formatted processable form.

This standard is based on ITU-T recommendation T.505, which was agreed on at the ITU-T SG 8 Geneva meeting in April 1991 and the Corrigenda No.1 (COM VIII - R24(Add.1)-E). It includes the contents of ITU-T recommendation T.505 in advance, which is to be revised for an alignment with ISO/IEC ISP 11181-1 at the beginning of the study period No.X(1993-1996).

2. Summary of departures from ITU-T recommendation/ISP

2.1 Selection of options from ITU-T recommendation/ISP

None

2.2 Selection of national matters from ITU-T recommendation/ISP

None

2.3 Comparison of chapter composition between this standard and ITU-T recommendation/ISP

	JT-T505	ITU-T recommendation and ISP
Chapter 0	Introduction	ITU-T T.505 Chapter 0
Chapter 1	Scope and field of application	ITU-T T.505 Chapter 1
Chapter 2	References	ITU-T T.505 Chapter 2
Chapter 3	Definitions and abbreviations	ITU-T T.505 Chapter 3
Chapter 4	Relationships with other profiles	ITU-T T.505 Chapter 4
Chapter 5	Conformance	ITU-T T.505 Chapter 5
Chapter 6	Characteristics supported by this	ISP 11181-1 Chapter 6
Chapter 7	document application profile	ISP 11181-1 Chapter 7
Chapter 8	Specification of constituent	ISP 11181-1 Chapter 8
8.1	constraints	8.1.1
8.2	Interchange format	8.1.4
8.3	Document interchange format	8.1.3
Annex A	Data lengths	ISP 11181-1 Annex B.2
Annex B	Encoding of application comments	ISP 11181-1 Annex B.3
	Font reference	
	ISO 8632(CGM) constraints	

3.History of revision

Version No.	Date	Content of revision
1st Version	April 27, 1993	First edition
