Access to...<http://dengon.ezweb.ne.jp/>

"Mobile evacuation tool supporting you safety"

- (1) Enabled for self positioning
- (2) Anti-disaster goods purchasable from sites
- (3) Accessible to Disaster Message Board
- (4) Still operate even if Mobile Phone radio signal is cut off

Evacuation shelter map

Get locations displayed, targeting wide-area evacuation shelters, railroads, main roads, administrative offices, railway stations, and emergency hospitals.

Set your destination to know the direction and distance to that place.

Point your Sun Icon to the sun to determine the direction facing ahead.

Homecoming support map

Make use of downloadable map that tells you the route between two points you have specified in advance.

Get information displayed, targeting the locations of evacuation shelters, emergency hospitals, disaster designated hospitals, convenience stores, toilets, among others.

Also get information displayed, targeting dangerous/hazardous points such as a block wall.

Peace of mind service - you can still use it should major disaster cause Base Stations to suspend transmission.

Aerial photo map

- ◆ Disaster information such as evacuation shelters displayed on aerial map focusing on any specified area
- ◆ Supports your evacuation planning at disaster by showing you how the streets look now

3D disaster map

- ◆ Displays the terrain of any specified area over a realistic image
- ◆ Helpful in predicting flooding risk level and planning an evacuation route bypassing heavy grades

Regional evacuation shelter map

- ◆ Provides a detailed map and disaster information targeting a specified area
- ◆ Wide area coverage allows you to get disaster information on your residential and surrounding areas
